EZ-LAN Unity 20

Makes Networking Easier and More Accessible!

- Simultaneously separate and distribute up to four discrete networks – e.g. lighting, audio, media, content, console, communications – with a few button presses
- Two EZ-LANs do the work of up to 8 unmanaged Gigabit switches
- 16 ports assignable in up to four, four-port groups
- Add a second fibre or copper connection for automatic redundancy and twice the speed
- Also available with OpticalCon DUO connectors

EZ-LAN makes today’s complex show networking easier and accessible for everyone. These simple to operate yet powerful Gigabit Ethernet switches distribute up to four discrete networks – lighting, audio, content, server, console, or communications – quickly, effortlessly, and simultaneously.

Users untrained in the complexities of managed networking can easily isolate networks and access and change VLAN assignments with a single button press.

With 16 ports, assignable in up to four separate groups, EZ-LAN is a revolutionary new addition to the ProPlex Data Distribution range of multiple format data management systems, all designed and built to withstand “Life on the Road.”

BUILT FOR THE ROAD!
DATA DISTRIBUTION YOU CAN DEPEND ON
